500mLe

Many years of experience in pharmaceutical manufacturing at Magdis and Neva facilities, as well as investing in research and development of effective disinfectants for the prevention of SARS epidemic in 2004 - to which new COVID-19 strain has been classified to, offers new CLINIC disinfectants based on highly effective components - ethyl alcohol, benzalkonium chloride, and broad-spectrum chlorhexidine.

The selection of disinfection components was also prescribed by the Croatian Institute of Public Health (CIPS), published on the Government's official website www.koronavirus.hr and by the European Center for Disease Prevention and Control (ECDC), stating that the disinfectant should contain at least one of the listed components:

- Ethyl alcohol (min 60%)
- Benzalkonium chloride (0.05%)

CLINIC PROFESSIONAL

disinfectant for dry hand washing and surface cleaning, with the synergistic activity of active components - benzalkonium chloride (0.1%) and ethyl alcohol (60%), has a highly effective activity:

- + Cleans hands and surfaces
- + Gives the skin a feeling of freshness and, due to its high share of glycerol, does not cause dryness or irritations
- + It is not greasy so it is ideal for cleaning all types of surfaces in public spaces, offices and households
- + Ideal for disinfection of clothes
- + Ideal for disinfection of equipment or accessories
- + Comes in 500 ml spray bottle with a pump and a dispenser, for convenient usage in any space

USE ON SURFACES:

Spray the surface

Let it work for one to three minutes

Wipe with a paper towel or allow to dry

USE ON THE SKIN:

Apply generously

Thoroughly rub into your palms and between your fingers

Allow to absorb for up to 1 min

Pump
250 ml

Spray
500 ml

Wall bottle
dispenser
500 ml

Pump
500 ml

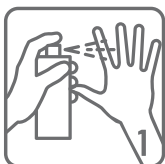

CLINIC DERMA PROTECT

Alcohol-free hand and body sanitizer with innovative formulation based on *benzalkonium chloride* and *chlorhexidine* with a broad-spectrum antimicrobial activity:

- + Protects the skin without harming its natural microflora
- + Easy to apply, absorbs within 1 minute, creating a fine, protective film on the skin due to formula enriched with:
 - *panthenol* soothes the skin, does not dry out, softens the skin
 - *allantoin* stimulates the regeneration of the skin, has anti-inflammatory activity
 - *aloe vera* soothes irritations and moisturizes the skin with a feeling of comfort
 - *glycerol* strongly binds moisture, protects and restores the skin's defense structure

USE ON THE SKIN:

Apply generously on the hands

Thoroughly rub into your palms and between your fingers

Allow to absorb for up to 1 min

Wall bottle dispenser 500ml
